

Engineered Wood Fiber

Dave Bang Associates uses only IPEMA certified engineered wood fiber from the finest companies. Our engineered wood fiber (EWF) is made from 100% fresh-grade wood and contains no waste wood such as pallets that could contain nails, spilled chemicals, paint or wood preservatives. It's processed to high-quality requirements using rigid production standards. Our EWF is naturally pervious and its installation specification ensures that critical fall protection exceeds safety standards. It provides ADA compliance for access and blends in with nature because it is nature.

since 1979

associates inc.

- IPEMA certified impact rating for 12'
- Cost effective
- Non-toxic virgin wood
- Low maintenance
- Natural looking
- Made from 100% fresh-grade wood
- ADA accessible

Our team will work with you to make your surfacing project an easy, stress-free experience. No project is too small, too simple, or too complex.

EWF is the most cost efficient safety surface from the initial investment through life-cycle for playgrounds.
